

Press Release

iGo Charge Anywhere Keeps Verizon Wireless Customers Powered While on the Go

SCOTTSDALE, AZ, Jun 01, 2011 (MARKETWIRE via COMTEX) --

With Verizon Wireless' new iGo Charge Anywhere from iGo, consumers can stop worrying about whether there is an electrical outlet nearby to charge up their mobile devices. This wall charger with an integrated battery provides peace of mind to deliver power anytime, anywhere. The iGo Charge Anywhere from iGo (NASDAQ: IGOI), the most trusted name in the mobile accessory market, is available now at Verizon Wireless.

Compatible with almost every mobile device on the market, the iGo Charge Anywhere contains an integrated battery that simultaneously powers two devices at once without being plugged into an outlet. The iGo Charge Anywhere can provide up to three full charges to most mobile devices while away from an outlet before it needs to be replenished.

"Staying on top of emails, coordinating carpools, or listening to your favorite song can really drain the power from smartphones such as iPhones and Android phones," said Wally Thornton, vice president of product management and supply chain of iGo. "The Charge Anywhere eliminates this inconvenience, providing the peace of mind that you can stay connected and entertained while on the go."

The iGo Charge Anywhere, available at all Verizon Wireless stores nationwide, comes equipped with everything consumers need to charge their iPod, iPhone and micro USB devices, including the Android phones, from the wall or on the go. Additional power tips for almost every other low power device on the market are available at www.iGo.com.
