

IGO CORPORATE OVERVIEW

iGo, Inc., based in Scottsdale, Arizona, is powering the multitude of devices and laptops in today's world with a single charger that uses interchangeable tips. As a leading developer of multi-device chargers and creator of the patented iGo® intelligent tip technology, iGo products charge hundreds of brands and thousands of models of mobile electronic devices.

iGo's growth is due to the popularity of its full line of wall, car and combination wall and auto multi-device chargers, such as the iGo everywhereMAX™ for laptop computers and mobile electronic devices. The everywhereMAX simultaneously charges both a laptop and an additional device from a single wall, car or airplane outlet. Additionally, iGo's new chargers with iGo Green™ Technology exceed Energy Star efficiency requirements and automatically use 80% less standby power than standard chargers.

With 20 million tips already sold, iGo is poised to sell its 15 millionth charger in 2009. iGo continues to expand a powerful worldwide distribution network that includes more than 20,000 North American retail locations including RadioShack and AT&T, as well as Hudson News and Brookstone airport stores.

iGo's products are also available at www.iGo.com as well as through leading resellers and retailers. For additional information call 480-596-0061, or visit www.iGo.com
